

Miyazaki™

ARTWORK BY
KUSALA™

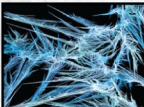

GRAPHITE ARTISTRY

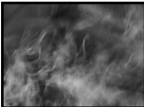

We consider the golf swing one of the most artistic movements in all of sports. The originality of our designs is artistically expressed on the canvas of each shaft series. Each series will be named after and defined by the artistic contributions of talented but previously unknown artists. Our inaugural design, based upon the three phases of fluids (ice, water, steam) was created by an artist by the name of Kusala.
